- .The dataset named "**Most Streamed Spotify Songs 2023**" has been downloaded from www.kaggle.com.
- .To know the details about dataset click here --> 
- .The average streams of the selected songs are 514.14M, and the average energy percentage is 64%.
- .Few songs received extreme responses from the audience, while some didn't receive as much attention. This is detailed in the Top5 package.
- .The heatmap indicates that most songs were released on Fridays, suggesting that people prefer entertainment content on weekends.
- .From the tracks' release dates, it is observed that a hype took place from 2021. Before that, the frequency wasn't as high, and not only that, the listener count also increased after that.
- .In the first report, features like danceability, acousticness, speechiness, valence, and liveness of individual songs are displayed. Slicers are provided on the top for filtering the report based on the category.
- .On the Top5 page, the names of the top 5 popular artists along with the stream count are displayed.
- .A matrix chart has been constructed using the data of playlist availability of these top 5 songs.
- .One pattern observed is that Spotify playlists recorded the highest number of stream counts for these top 5 songs, depicting user bias towards the Spotify application.

The dataset named "Most Streamed Spotify Songs 2023" has been downloaded from www.kaggle.com. This dataset contains a comprehensive list of the most famous songs of 2023 as listed on Spotify. It offers a wealth of features beyond what is typically available in similar datasets. The dataset provides insights into each song's attributes, popularity, and presence on various music platforms. It includes information such as track name, artist(s) name, release date, Spotify playlists and charts, streaming statistics, Apple Music presence, Deezer presence, Shazam charts, and various audio features.

1. track_name: Name of the song
